

# LIPOBLEND EXTRA

Lipotropic Injections are used as a dietary supplement that aids in the metabolism of fats and carbohydrates. These Lipotropic nutrients are compounds that promote the flow of fat and bile to and from the liver. In essence, they produce a “decongesting” effect on the liver and promote improved liver function and fat metabolism.

## INGREDIENTS IN LIPOBLEND EXTRA

### **Methionine**

- Has a fat-dissolving effect and reduces the depositing of fat in the liver. It has anti-inflammatory properties, is a pain-reliever and stimulates the formation of cartilage tissue.

### **Inositol**

- Dietary supplement that breaks down sugars to use as energy. Regulates hormones, reduces anxiety and is an antidepressant. Reduces risk of diabetes, reduces symptoms of Alzheimers, OCD, PMS, PTSD, and Bi-polar disorder.

### **Choline**

- Contributes to the health of cell membranes in the brain, protecting neural membranes and encouraging excellent signalling capacity. Choline is also a key precursor in the production of acetylcholine, the neurotransmitter which regulates the forming of memories, recall of information, the ability to focus, verbal reasoning, and some math skills. Helps you feel your best physically and mentally.

### **Pyridoxine (B6)**

- Is involved in more bodily functions than almost any other single nutrient. It is necessary for the production of hydrochloric acid and the absorption of fats and proteins. It also aids in maintaining sodium and potassium balance, therefore benefitting the control of water retention. Pyridoxine is important for normal brain development and for keeping the nervous system and immune system healthy.

### **Dexpanthenol (B5)**

- Plays an important role in metabolism by breaking down fats and carbohydrates for energy. It is used for maintaining a healthy digestive tract and helps the body use other vitamins more effectively. Regulates the immune system and improves the body's ability to withstand stressful conditions.

# LIPOBLEND EXTRA

## INGREDIENTS IN LIPOBLEND EXTRA, CONT.

### **Cyanocobalamin (B12)**

- Helps with Memory Loss, boost mood, increases energy, boosts the immune system, slows aging, used for heart disease, liver and kidney disease. Also helps with male infertility, diabetes, sleep disorders, depression, mental disorders, and weak bones (osteoporosis).

### **L-Carnitine**

- Transports fatty acids more quickly and throws them into the metabolic furnace. This means that the body is burning fat instead of storing it. Owing to its fat-oxidizing effect, carnitine is also used for weight reduction and is often referred to as a “fat burner”. Used to reduce High cholesterol, reduces risk of heart disease, helps with infertility, circulation, brain disorders like Rhatt Syndrome, chronic fatigue syndrome, diabetes, overactive thyroid, ADHD, and to improve athletic performance and endurance.

### **L-Arginine**

- Reduces fat mass and increases muscle mass. L-Arginine is known to increase the activity of insulin, which manipulates hormones that metabolize fats. It also increases strength for exercises, thus making it effective in a weight loss program. Supports kidneys in excretion, improves the flow of blood, boosts immunity, improves recovery after an illness and increases the output of the growth hormone.

## POTENTIAL SIDE EFFECTS

- Rare allergic reaction to vitamin or amino acid components
- Temporary mild headache or digestive upset in sensitive individuals

## HOW TO USE

1ml administered 1–2 times weekly or as directed by your provider. Given as an intramuscular (IM) injection in the arm or gluteal muscle. Store in refrigerator,

## WHEN TO EXPECT RESULTS

Many patients notice increased energy within the first few weeks. Metabolic and wellness benefits typically occur with consistent use over 1–3 months.

## DELIVERY AND DOSING SUGGESTIONS

Vials may be purchased in 4ml and 10ml quantities. It is shipped via FedEx to your doorstep.

**FOR REFILLS, CALL/TEXT YOUR PROVIDER AT 360-727-0998 WHEN YOU HAVE 3 WEEKS OF MEDICATION REMAINING.**
